

ASTRO PENDANTS

The Astro pendant in both rod and flex versions is a simple aesthetic fitting which looks striking as a single or multiple pendant to make that clean architectural statement. The Astro comes in 4 versions each with their own benefits. The long body with fitted weights to help straighten out those kinks in the flex. The long body cover where the tube rests on the globe and hides the cord grip. The short body that just covers the lamp holder and the short body with extended lamp holder thread that allows a shade to be fitted. The flex versions comes standard with 1 metre of flex and an 80mm canopy. They are also available as multi drop units with a range of canopy options as well as single point entry. They are available in all our standard powder coat finishes as well as brushed aluminium, copper and brass.

Elettra Products are Australian owned and manufactured.
