

The fitting below is a Metro 6 complete with GU10 lamp holder suitable for LED Globes. The gear tray can be mounted through the plate allowing for ease of fitting on site. The Powder coated reflector is assembled with two side entry 4mm screws and can be removed for maintenance when required. It is constructed with a plastic lamp holder and steel control gear and housed in a powder coated Aluminium reflector. It can be manufactured to suit a range of GU10 length LED globes. Elettra Products are Australian owned and manufactured.

**METRO 6 GU10 LED Surface Mounted**      **Product Code: 050-306-101**

**Reflector Tube Powder Coated White**

Overall standard length of the fitting is 200mm and the diameter is 60mm. The distance from the mounting plate to the top of the lamp holder is 100mm but can be varied by modification of the nipple length. Accordingly the globe length and nipple length will determine the final position within the tube.
