

## SOCA PENDANT

Spun on a segmented chuck that is dismantled after spinning and then rebuilt for the next spinning very much like a 3D puzzle results in this smooth pendant. The pendant pictured has been finished in brushed aluminium outside with the bottom edge sand blasted for contrast. It has been powder coated white inside and has been fitted with an integrated 8.5 Watt Led that is 50% dimmable. Its diameter is approximately 200mm and can be supplied in any of our standard colours or brushed aluminium finish. All assembly is completed within the spinning allowing for the smooth external ball appearance.

Elettra Products are Australian owned and manufactured.

## **SOCA PENDANT Interior Pendant 8.5W Integrated LED**

### **Product Codes:**

020-520-001 Soca Pendant E27 Lamp holder
