

The year is rapidly coming to a close and we would like to thank our valued customers for their support through 2015. Listed below are just a few of the different products we have developed and manufactured through 2015. Our manufacturing and administrative functions will be closed from lunchtime December 22nd and reopen for business Monday 11th January 2016. We wish you a Merry Christmas and happy new year for the coming festive season and look forward to a busy and prosperous 2016. More detail on our website at www.elettra.com.au

METRO 15

This new Metro 15 pendant is fitted with a 17W LED and is sandblasted in the middle as well as inside the tube. It is then clear coated and powder coated black. It is manufactured from 150mm diameter aluminium tube 3mm thick and 600mm long. It is available either on a rod or a pendant or in a close to ceiling version. Other light sources and length variations are available on request. It can be powder coated any of our standard colours.

A TOUCH OF WHIMSY

Cleaning up the factory a few weeks ago we stumbled across some very old (turn of the 19th century!!) planter chucks. Made from no longer seen pig iron Elettra couldn't resist the opportunity of putting these century old chucks back to work. Coming in the old imperial sizes of 5 ½, 6 ½, 9 and 11 inch. We believe the results were stunning. For a real Made in Melbourne feel with 100 years of tooling history behind it let us know what you think.

TUBE SPOT

This 60mm diameter Tube spot is a variation on our standard with side entry swivel. It is available in both low voltage or GU10 light sources and is readily fitted to either a canopy for wall and ceiling mount or most track adaptors. The front snout is a push fit and allows removal for easy globe changeovers. The units pictured are powder coated mannex black but are obviously available in all our standard finishes.

PETTICOAT PENDANT

This unusual pendant is spun on a steel tool. The skirt is achieved through work hardening the aluminium when spinning and as a consequence no two products are the same. The pendant measures approximately 540mm in diameter 250mm high and comes standard with an E27 lamp holder on 1 metre flex. It is available in our standard powder coat finishes or can be custom sprayed to match most Dulux colours. It can also be manufactured in a 8.5 or 17W LED with fitted flat plate. It is a made to order item and requires a little more lead time than most of our standard fittings. It is only available in aluminium.

SOCA PENDANT

Spun on a segmented chuck that is dismantled after spinning and then rebuilt for the next spinning, very much like a 3D puzzle, results in this smooth pendant. The pendant pictured has been finished in a brushed aluminium outside with the bottom edge sand blasted for contrast. It has been powder coated white inside and has been fitted with an integrated 8.5 Watt Led that is 50% dimmable. Its diameter is approximately 200mm and can be supplied in any of our standard colours or brushed aluminium finish. It is also available with other light sources such as GU10, BC or ES as well as low voltage.
