

The advent of another Federal election for some unknown reason always allows a breather in business for a few short weeks. For us this allows the opportunity to squeeze in some much needed plant improvements and a chance for a small update on recent products we have manufactured and that are now available. More details on our website at www.elettra.com.au

HORIZON

2016 the year of the Monkey. The year has started with a real bang here at Elettra as we work hard to get a host of your orders out. However, that has not deterred Linda from coming up with a very chic work place light fitting. The very elegant Horizon slim line brass design lends itself to a host of work spaces from crowning the company's board room table, enhancing a kitchen's ambience to lighting up a professional reception area. Fitted with warm white LED's the Horizon can be made to various lengths and in various finishes depending on client's requirements. So rather than the 2016 Monkey swinging from the chandeliers - lets give 2016 some real swinging class and enhance your work space with Horizon!

The unit above is 1200mm long manufactured from steel and powder coated white. Top quality Stark LED strip is fitted to the unit giving both high lumen output and the ability to dim using either Dali or 1-10V dimming systems. Technical details of the LED strip are available from our website.

The unit below is manufactured from 1.2 gauge brass and is 900mm long. Width and height of the reflector are 100mm and 90mm respectively.

CENTRIK

The Centrik can be either a single circle with a globe droplet or for a totally different take three concentric layered circles that can be composed into either a single flat centric composition or alternatively into a globed ring effect surrounding the featured globe. Either way the Centrik's versatility can be used to create totally different effects dependant on the scope and vibe of its surroundings. The Centrik's "rings" can be made in a range of mediums – copper, brass, aluminium and can be finished / powder coated to suit client specifications.

Elettra manufactures and finishes products on site and maintains a large range of components and manufacturing processes aligning the business to bespoke manufacture and design. We reserve the right to change or modify designs without notice.
